BORUSAN HOLDING AT A GLANCE

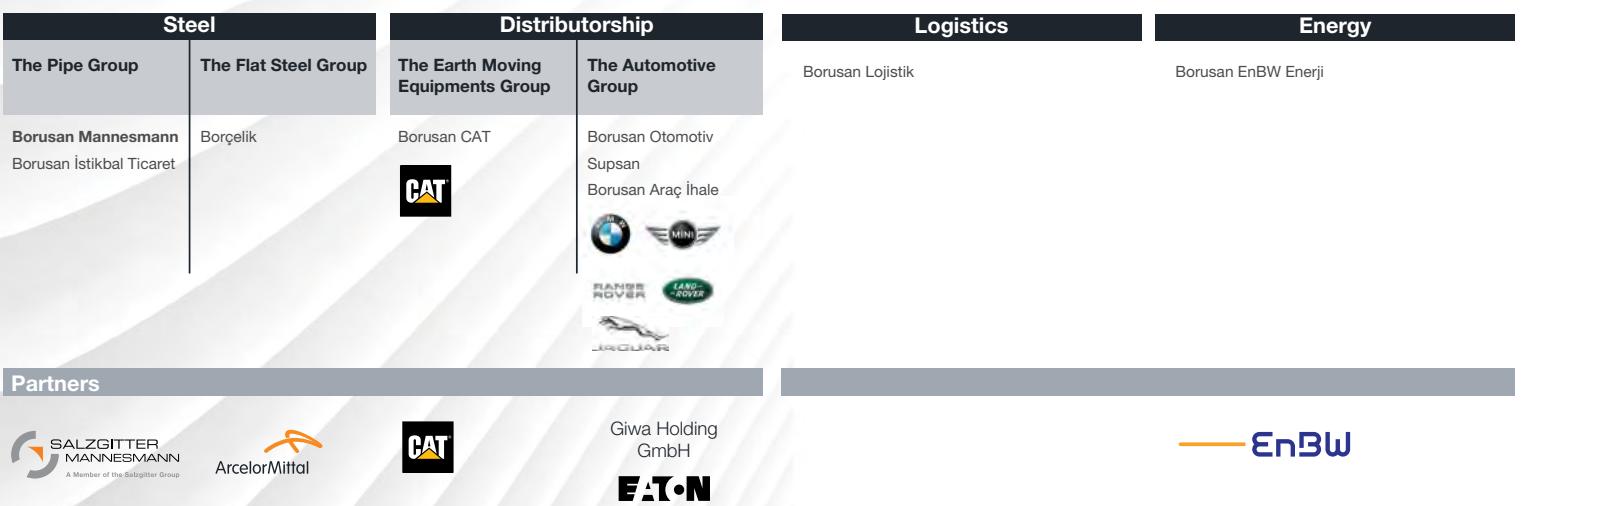

In 4 major business areas, with 11.000 dedicated employees...

Borusan Group has been among the pioneers of industrialization and corporate governance in Turkey throughout its 75 years of history. The group currently operates in four major business areas including steel, distributorship, logistics and energy. In 2006 Borusan Group signed the United Nations' Global Compact Policy and it supports and adheres by the principles of "good corporate governance" and "sustainability" as a prerequisite component for long-term and permanent success.

Contribution to Community

Borusan has adopted the principle of giving back to the community with which it does business. In order to better carry out Borusan's social responsibilities, Borusan Kocabiyik Foundation was established in 2008, merging the activities of Asim Kocabiyik Culture and Education Foundation and Borusan Culture and Arts under a single roof. With a deep social responsibility consciousness, the Borusan Group established the Borusan Center for Culture & Arts on October 15, 1997. The Borusan Center for Culture and Arts is a member of the International Society of Contemporary Music (ISCM) and the European Music Council (EMC) and organizes the annual Mediterranean Contemporary Music Days. Though it began with modest numbers, the chamber orchestra was transformed into one of the leading Turkish philharmonic ensembles under its former artistic director and principal conductor Sascha Goetzel. Giving its concert premiere in May 1999, BIPO has since become a prominent element of Istanbul's cultural scene.

BORUSAN MANNESMANN IN BRIEF

"Celebrating its 60th anniversary, Borusan Mannesmann is among the leading manufacturer of steel pipes in the world with its 1.4 million tons of annual production capacity."

Steel pipe manufacturing is the core business of the Borusan Group, a conglomerate made up of 15 companies spread over four different industries; steel, distributorship, logistics and energy with around 7 billion USD turnover and more than 11.000 employees. Borusan Mannesmann currently continues its production activities with its 6 facilities in 3 different countries in Turkey, Italy and USA.

The company's product range includes; water pipes, oil and gas line pipes, industrial pipes and profiles, installation pipes, OCTG pipes and hollow sections. Borusan Mannesmann has wide experience and range of track records in oil and gas pipeline projects both in domestic and international markets with high grade API standards.

A dynamic, highly qualified staff, regularly trained to keep abreast of new manufacturing and management, ensure that production conforms to exacting quality standards. Borusan Mannesmann has become the standard-bearer for trust and quality in the sector by bringing added value to products and services with 1.800 highly qualified employees and the continuously improving work force.

Workforce : 60
Area : 10.000 m²

CUSTOMER BENEFITS

Exceeding Limits with Continuous R&D

Borusan Mannesmann's research and development philosophy enables us to carry out research activities in all markets and develop new products for our customer's and market needs. As Borusan Mannesmann; we also conduct joint projects together with our raw material suppliers in developing special material qualities for the manufacture of desired product. We collaborate in performing trial productions and troubleshooting activities to maintain excellence in product and process design and implementation to the best possible extent.

As a company that embraces Lean 6 Sigma methodology; launching breakthrough technologies, improving production and process control steps, is a part of our daily life.

Integrated Delivery Services

Challenging the dynamics of global competition, Borusan Mannesmann gets the maximum benefits from the location advantage of its plants. Borusan Mannesmann's state of the art Houston Plant has direct rail and barge accesses with dedicated trucks. Also owned solely by Borusan Group, Borusan Port in Gemlik location is one of Europe's most important ports in terms of both size and location. Its physical conditions and Equipment Park enables Borusan Port to serve container and bulk vessels at the same time with the capacity to handle 5 million tons of cargo, 250.000 vehicles and 400.000 TEU containers.

Borusan Mannesmann regularly provides shipping to many different destinations in the world - an ability, which gives the company a certain edge on transportation by sea. Borusan Logistics is our delivery partner that provides services of chartering and project transportation, as well as international bulk, container, land, railway and air transportation. As a solution partner with its reliable services and tracking systems in international transportation, Borusan Logistics creates value for us in terms of our "port to door" deliveries.

Turnkey Synergetic Solutions

Our customers are assured that all of our products meet their expectations varying from internationally recognized specifications to special requirements. Borusan Mannesmann provides turnkey products either with its modern integrated facilities or reliable processing suppliers, for its customers.

VOC - Most Valuable Driving Force

Borusan Mannesmann has been capturing the requirements and feedback of our customers to provide the best product and service quality. We have been applying the VOC - Voice of Customer process since 2003. Serving to our customers and delivering synergetic solutions in the most cost effective way is a consistent discipline in Borusan Mannesmann. We aim to compose personal recipes for special market needs. This approach leads us to go beyond ourselves and present valuable services for our customers.

Well Established Sales Organization

Borusan Mannesmann's sales experts provide fast response and reliable technical consultation in close cooperation with our customers before and after the sales process. Our sales organization is made of professional local representatives who speak our customer's language in their market and always provide the best solutions for the business. Company's representatives are carefully picked from the best of highly qualified distributors in the local market. We provide the best solutions; in your country, in your language with equipped people.

OUR TEAM

There is no limit of the human potential. Success brings the desire to achieve more. Having a principle of ‘being one step ahead’, our talented workforce is dedicated to achieve a high level of customer service. Our sales organization consists of the experts of their fields, both in planning, sales and trade operations. The educational and developmental programs which will create a significant difference for Borusan members in means of business processes and personal development are designed by the Borusan Academy. The Leadership and Sales Faculty programs are jointly offered with the assistance of Sabancı University, Executive Development Unit. They consist of various certification programs which include long-term postgraduate level education and development topics prepared by locally and internationally renowned experts in their fields.

QEHS Management

Borusan Group companies all share a common set of guiding principles, which help this vast enterprise to operate in complete harmony. These principles are commitments to productivity, innovation and environmental responsibility.

From raw material to finished product, Borusan Mannesmann determines the impacts on environment and in order to reduce impacts, controls each step of the process. Our Environmental Management System certificate (ISO 14001) proves our commitment to environment.

Healthy performance is delivered through healthy people. In compliance with Occupational Health and Safety Management Standard (OHSAS 18001) Borusan Mannesmann endeavors to protect health and safety of its work force and service providers.

Borusan Mannesmann; exemplary with its modern management approach as well as its investments, has been applying The Lean Six Sigma methodology since 2002 and Voice of Customer (VOC) process since 2003.

The Lean Six Sigma methodology is a highly disciplined business management strategy that seeks to remove the causes of defects in production and business processes, and to continuously improve productivity, profitability and customer satisfaction. Besides with the VOC process, we capture the requirements and feedback from our customers to provide the best product and service quality.

Ongoing efforts to improve customer satisfaction brought Borusan Mannesmann, Complaints Handling Management Systems Certificate (ISO 10002); which is a first in steel pipe sector globally.

ENERGY

OCTG-CASING AND TUBING

Sizes

Outside Diameter	Wall Thickness	Length
26,7 mm - 339,7 mm 1.050" - 13.375"	2,87 mm - 13,06 mm 0.113" - 0.514"	6,00 m - 18,30 m 19,68 ft - 60,04 ft

Production Standards & Material Qualities

- API 5CT certified for threaded and coupled casing and tubing (According to API 5B)
- Full ERW grade range: H40, J55/K55, L80, N80, FBNAU, P110 and Q125
- Proprietary as rolled 80, 90 grade available
- Enhanced high collapse versions of L80 and P110 grades available

Tests & Certificates

- API 5CT
- Visual and dimensional inspection
- Mechanical Tests: Tensile, Flattening, Expanding
- Steady scarfing with 100% weldline ultrasonic testing
- Hydrotesting in place of 100%
- Consistent wall thickness with oversize drift options available
- Reduced tolerances through statistical process control
- Uniform concentricity, roundness, straightness and cylindricity
- Fully normalized weld zones
- NDT Standards: U/S (ASTM E 213 Level 3)
- Suitable for directional drilling and multiple fracturing operations
- Accredited lab tests and third party inspections available (full body and weld line UT, EMI, SEA)

Finishing Operations

- Plain end square cut or high quality API 5B certified threading and coupling
- Premium and semi-premium threads available
- High quality threaded compound, couplings and protectors
- Torque controlled coupling application
- External corrosion prevention with durable and environmentally safe coating

TUBES FOR PRESSURE PURPOSE / BOILER TUBES

Sizes

Outside Diameter	Wall Thickness	Length
21,3 mm - 339,7 mm	2,0 mm - 12,7 mm	5,00 m - 18,30 m

Finishing Operations

- Plain End-Square cut or bevelled
- Black self colored/uncoated
- Surface protective coating (black varnished)

Production Standards & Material Qualities

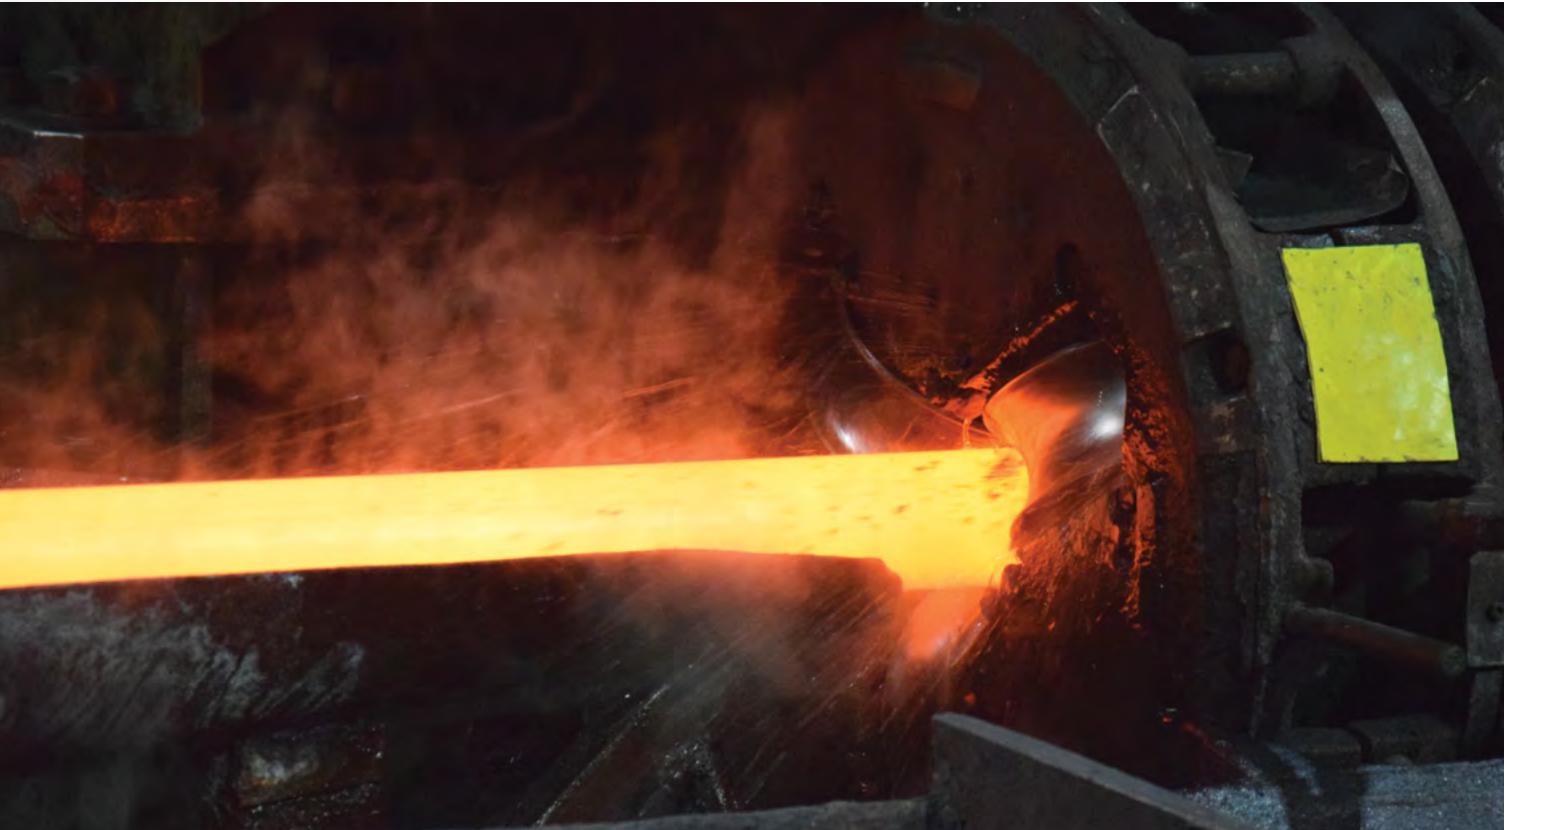

ASTM A 178	GrA, GrC, GrD
EN 10217-1 (BS 3059 Part 1)	P195 TR1/TR2, P235 TR1/TR2, P265 TR1/TR2
EN 10217-2 (BS 3059 Part 2)	P195 GH, P235 GH, P265 GH
EN 10217-3	P355 N, P355 NH

Quality Certificates

AD-2000 WO, AD-2000 W4, PED

NDT Standards

UT (EN ISO 10893-11), ET (EN ISO 10893-2)

Tests & Certificates

- Visual and Dimensional Inspection
- Mechanical Tests:
 - Tensile Test, Flattening Test, Flaring Test
 - Expanding Test
- Metallographic Examination
- Chemical Analysis
- Hydrostatic Test
- Non Destructive Inspection:
 - In-Line Ultrasonic (weld check)
 - Eddy Current
- Mill Test Certificates

Acc. to EN 10204 2.1; 2.2; 3.1; 3.2

PED Certified-Pressure Equipment Directive 2014/68/eu Certified

WATER TRANSMISSION

ERW WATER PIPES

Sizes

Outside Diameter	Wall Thickness	Length
21,3 mm - 339,7 mm	2,0 mm - 12,7 mm	3,00 m - 18,30 m

Production Standards & Material Qualities

- Production Norms
EN 10224, EN 10255, ISO 65, ASTM A 53, ASTM A 795, ASTM A 589
- Galvanizing Norms
EN 10240, EN ISO 1461 (BS 729), ASTM A 53, NFA 49-700, UNI 5745
- Production Standard For Threading and Coupling (1/2"-6")
ISO 7/1, ANSI B.1.20.1, EN 10255
- Grooving (3/4"-12") according to Victaulic Standard.
- Our Medium Series Pipes can be used up to 25 bar operating pressure for water.
- Material Qualities
DIN 17100 St 37, St 44, St 52
EN 10025 S 195, S 235, S 275, S 355
Gr A, Gr B

Tests & Certificates

- Visual and Dimensional Inspection
- Leak tightness testing: Hydrostatic Test, Eddy Current Test
- Destructive Tests: Flattening, Bending
- Mechanical Tests
- Chemical Analysis
- Metallographic Examination
- Others as required by the standards
- Ultrasonic weld seam test if applicable for gas pipes
- Mill Test Certificates
 - Issued upon request according to EN 10204 2.1; 2.2; 3.1; 3.2
- NDT Standards:
 - ET (EN ISO 10893-2), ET (ASTM E309)

Finishing Operations

- Plain end (square cut or bevelled)
- Threaded and coupled (Max OD: 168,3 mm)
- Grooved
- Outside protective coating (black or red vanished), temporary oil application
(Other colors are available upon request.)
- Hot dip galvanizing
- PE, PP Coating
- Bare Pipe (Uncoated)

A53/A53M -12

Sizes

Outside Diameter	Wall Thickness
26,9 mm - 323,9 mm	2,00 mm - 12,70 mm

Technical Specifications

- FM approved
- UL/C-UL Listed
- NFS certified
- Tight tolerances
- Consistent wall thickness, straightness, roundness
- CE, PED certified
- Pressure tested
- Reliable high steel quality
- Galvanised sandblasted varnished coated black, red (RAL 3000, RAL 3002, RAL 3009) or grey (RAL 7012)
- Plain Ends, Grooved or Threaded & Coupled
- Custom length availability

WATER WELL CASING PIPES

Sizes

Outside Diameter	Wall Thickness	Length
33,4 mm - 323,9 mm	3,2 mm - 9,5 mm	6,00 m - 18,30 m

Production Standards & Material Qualities

- ASTM A 589 Type I, II, III, IV Production Standard
- Reliable High Steel Quality
- From Grade A or Grade B Material Quality
- Weldable
- Threadable

Finishing Operations

- Threaded Option up to 6"
- Hot Dip Galvanised Option up to 6"

Tests & Certificates

- Visual and Dimensional Inspection
- Leak tightness testing: Hydrostatic Test, Eddy Current Test
- Destructive Tests: Flattening, Bending
- Mechanical Tests
- Chemical Analysis
- Metallographic Examination
- Others as required by the standards
- Mill Test Certificates
 - Issued upon request according to EN 10204 2.1; 2.2; 3.1; 3.2
- NDT Standards:
 - ET (EN ISO 10893-2), ET (ASTM E309)

Product Options

Weight per Foot (Lbs)

Nominal Size	Wall Thickness	Threaded and Coupled	Plain End
1	0.133	1.69	1.68
1-1/4	0.140	2.28	2.27
1-1/2	0.145	2.74	2.72
2	0.154	3.68	3.65
2-1/2	0.203	5.85	5.79
3	0.216	7.68	7.58
3-1/2	0.226	9.27	9.11
4	0.237	10.92	10.79
5	0.258	14.90	14.63
6	0.280	19.34	18.99
8	0.322	-	28.58
10	0.365	-	40.52
12	0.375	-	49.61

SPIRALLY WELDED WATER LINE PIPES

Sizes

Outside Diameter	Wall Thickness	Length
508 mm - 3.048 mm	5,16 mm - 25,4 mm	Single lengths up to 24,50 m

Production Standards & Material Qualities

EN 10217-1	P195 - P265 TR1&TR2
EN 10224	L235 - L355
AWWA C 200	Grade 30 - Grade 50
UNI 6363	Fe 360 - Fe 510

*Production Range: See page 21

Coating Standards

- Dual Layer Abrasion Resistant FBE OD Coating: API 5L7, CSA Z 245-20, NACE RP 0394, AWWA C213
- FBE (Fusion Bonded Epoxy) OD Coating: API 5L7, CSA Z 245-20, NACE RP 0394, AWWA C213
- Polyethylene OD Coating: DIN 30670, TS 5139, NF A 49-710, UNI 9099, EN ISO 21809-1
- Polypropylene OD Coating: DIN 30678, NF A 49-711, EN ISO 21809-1
- Flow Coat Epox ID Coating: API RP 5L2, EN 10301
- Epoxy ID Coating: AWWA C 210
- Cement Mortar: AWWA C 205, DIN 2614, BS 534, EN 10298

CONSTRUCTION

CIRCULAR HOLLOW SECTIONS

Sizes

Circular Hollow Sections

Outside Diameter	Wall Thickness	Length
21,3 mm - 339,7 mm	2,0 mm - 12,7 mm	5,00 m - 12,0 m

Production Standards & Material Qualities

EN 10305-5	E 195, E 235, E 275, E 355
BS EN 10029	GR 43 C
ASTM A 500	GR A, GR B, GR C
EN 10219 (BS 6363)	S 235, S 275, S 355, S 460 MH, NH (J0H, JRH, J2H, K2H, GR 34/26, GR 43/36)

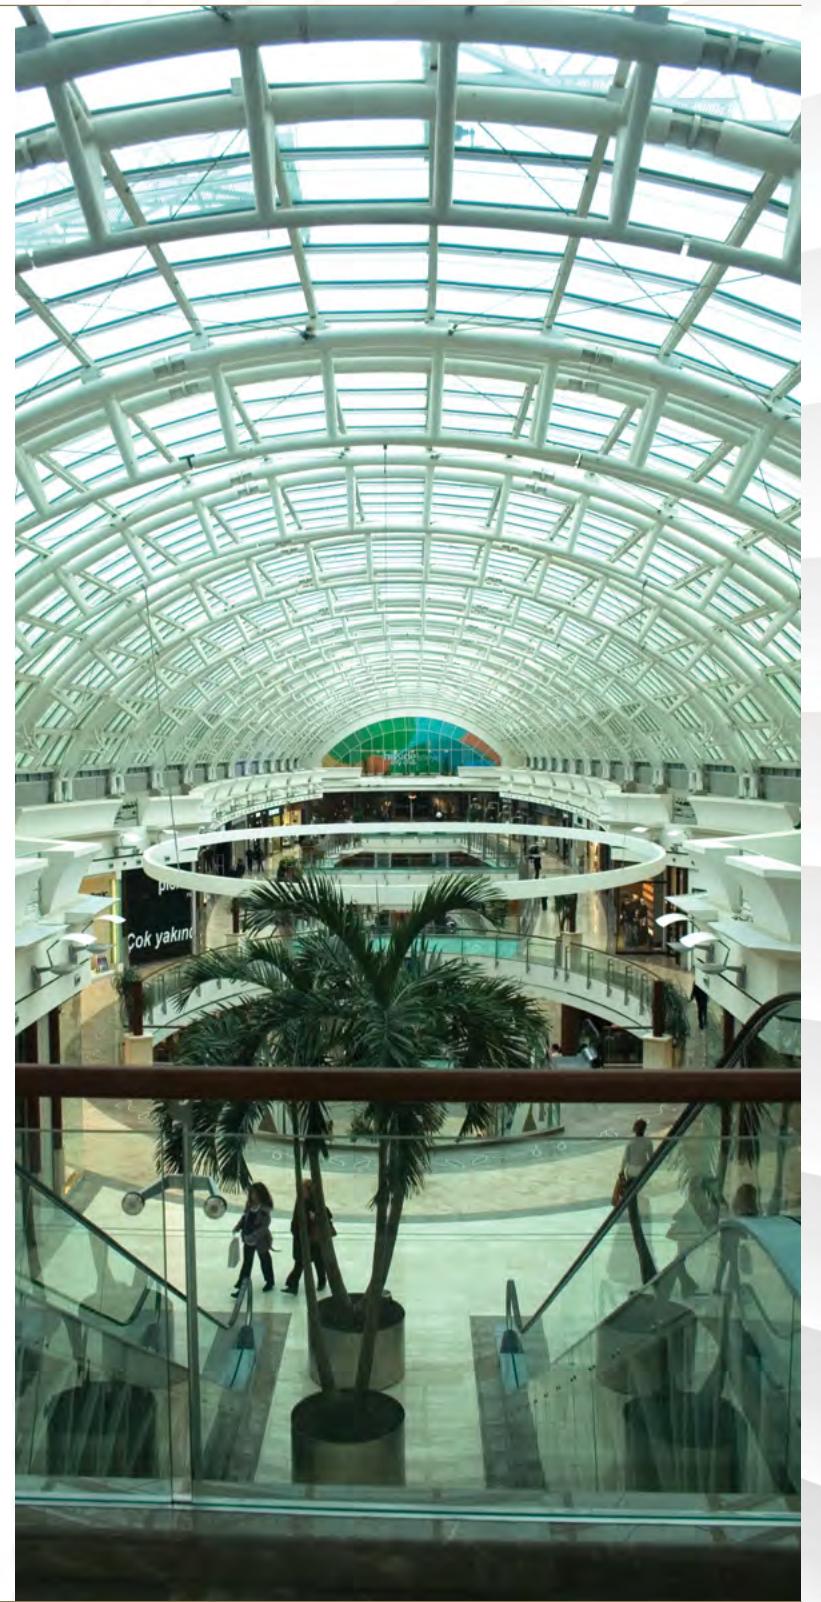

Tests & Certificates

- Visual and Dimensional Inspection
- Mechanical Tests:
 - Tensile Test
 - Flattening Test, Flaring Test
 - Expanding Test
 - Impact Test
- Metallographic Examination
- Chemical Analysis
- Non Destructive Inspection: In-Line Ultrasonic (weld check)
 - In-Line and offline Eddy Current (for round tubes)
- Mill Test Certificates
 - According to EN 10204 2.1; 2.2; 3.1; 3.2
- NDT Standards
 - ET (ISO 10893-2)
- Quality Certificates
 - EN 10219 - EN10210 CE marked

Finishing Operations

Plain End-Square cut or bevelled
Black, self-colored/uncoated

Mill protective oil coating; for both round,
square and rectangular tubes, black varnish
for outside surface of round tubes.

AUTOMOTIVE TUBES

Borusan Mannesmann is a highly recognized manufacturer for its product and service quality in automotive industry. Our plants, one in Vobarno-Italy and one in Halkalı-Turkey are specialized in production of value added precision tubes that are used in crucial parts of vehicles. Working together; our sales, quality and design teams manage all kinds of technical, schematic inquiries and come up with custom made solutions. As a reliable supplier of automotive sector for years Borusan Mannesmann's products are commonly used in; shock absorbers, cardan shafts, exhausts, gas springs, car&bus seat frames, head rests, door impact beams, cross car beams, steering columns and tie rods.

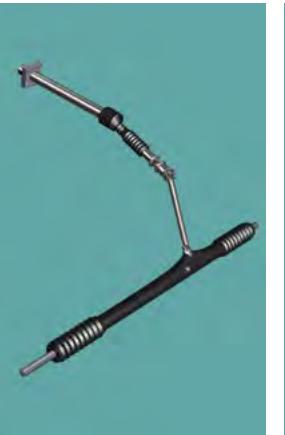

Door Impact Beams

Tie Rod Tubes

Cardan Shaft Tubes

Steering Column Tubes

Head Rest Tubes

Exhaust Tubes

Shock Absorber Tubes

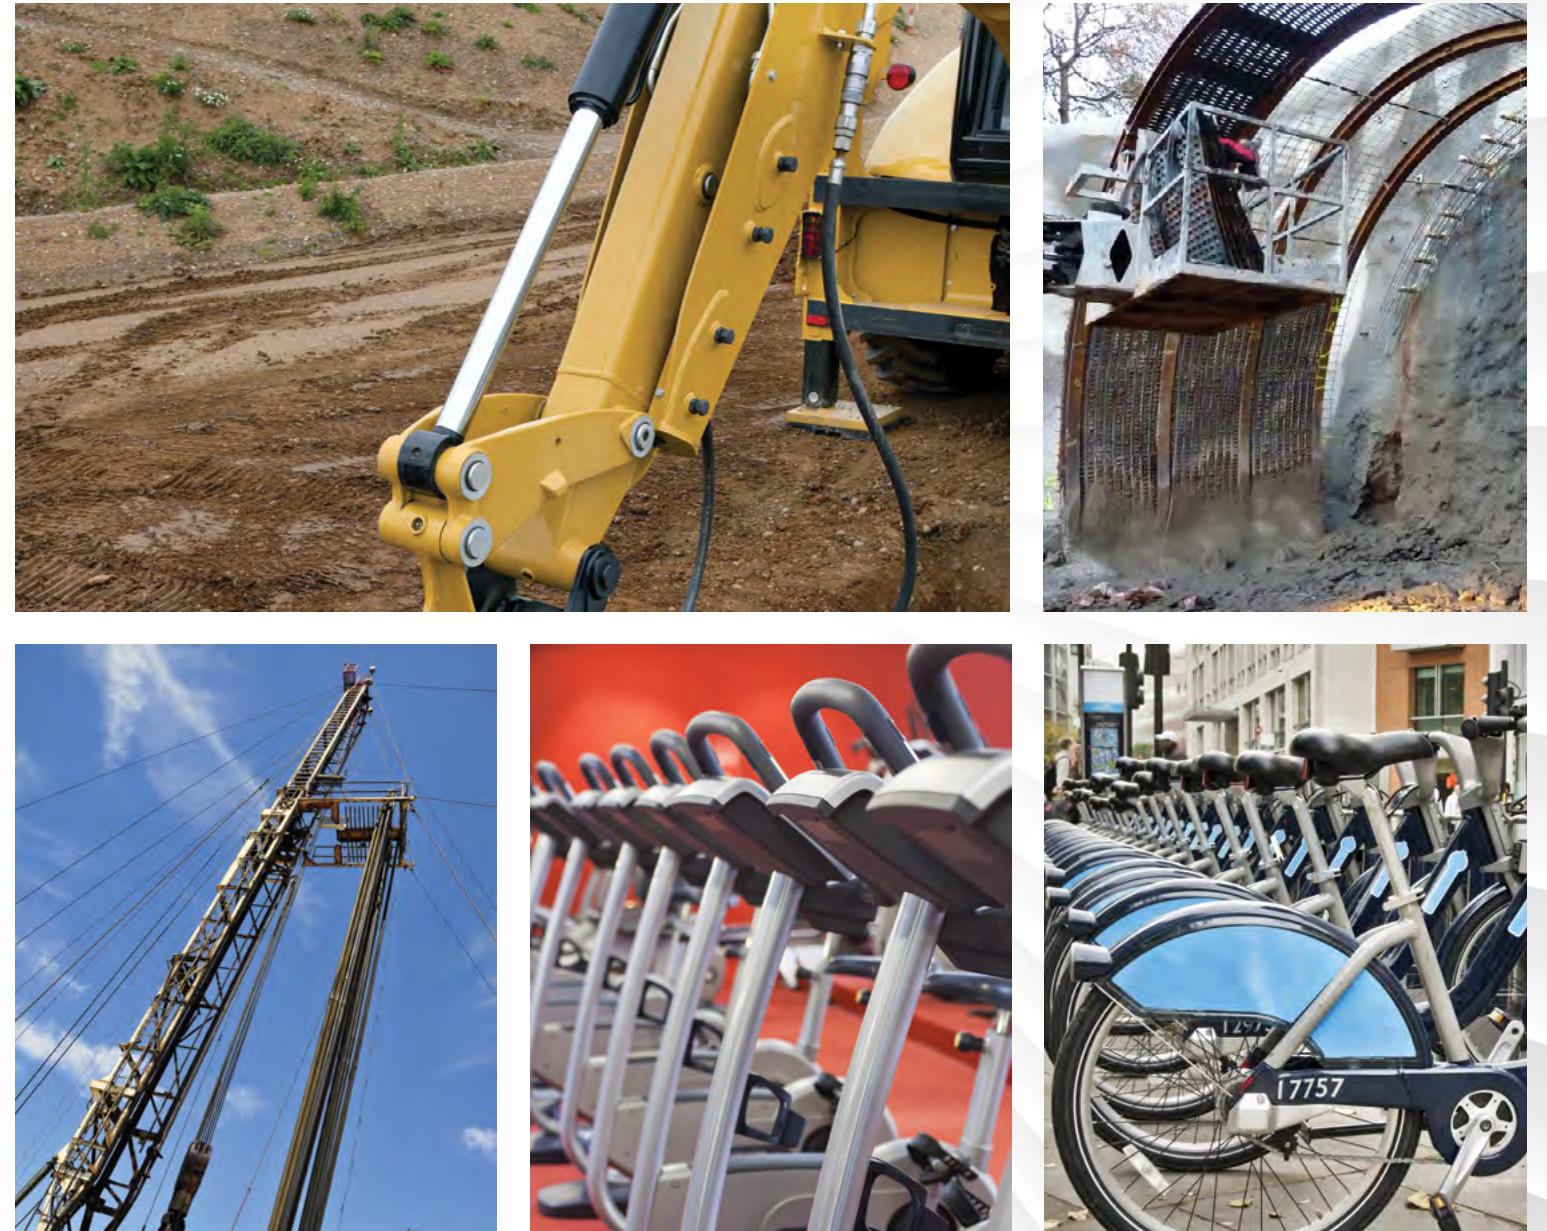

Seat Frame Tubes

Cross Car Beams

INDUSTRIAL APPLICATIONS

Borusan Mannesmann's wide production range in precision business, enables company to serve in various kinds of industries ranging from hydraulic - pneumatic applications and drilling to mechanical applications. We are proud of being a preferred supplier of these industries for years with our delicate approach in meeting the most stringent customer requirements.

Delivery Conditions:
 M.D., S.S.I.D.
 M.D.: Mandrel Drawn
 S.S.I.D.: Special Smooth Inside Diameter
 Standard Norms
 Supplied: ASTM A 513 Steel Grades Mainly Used: 1008-1040
 Please contact our sales department for any inquiries.

Welded Hollow Sections for Precision Applications (EN 10305-5)

Side Length	Wall Thickness (mm)									
	0,8	0,9	1,00	1,20	1,50	2,00	2,50	3,00	3,50	4,00
8 x 20										
10 x 10										
10 x 15										
10 x 18					</					

COATINGS AND LININGS

COATINGS AND LININGS

Scope and Field of Application

Borusan Mannesmann products are manufactured with modern equipments offering a wide range of anti-corrosive coatings. The below graph illustrates the type of coatings applied externally and internally according to standards and special customer requirements.

Surface Preparation

The process enabling the appropriate surface cleanliness and smoothness level according to the type of coating is applied by blasting method. (Sa 2 1/2)
(DIN 55928, SIS 55900)

Galvanizing

Especially for water pipes, BMB Galvanizing operations are currently applied to export U.S and many of European countries.
(ASTM A53, TS EN 10240)

PE-PP Coating

Excellent protection for buried pipes, high mechanical strength and corrosion resistance.
Low, medium or high-density polyethylene or polypropylene coating.
3 Layer Coating Method:
Layer 1: Electrostatic epoxy primer.
Layer 2: Extrusion adhesive wrapping for spiral, electrostatic adhesive layer for ERW.
Layer 3: Extrusion polyethylene or polypropylene wrapping for spiral, hot extrusion for ERW.
For PE: EN ISO 21809-1 (DIN 30670, NF A 49-710, UNI 9099)
For PP: EN ISO 21809-1 (DIN 30678, NFA 49-711)

Flow-Coat Epoxy Lining

For gas transmission lines in order to reduce pipewall roughness thus increasing throughput. Average thickness 60 µm.
(API RP 5L2)

Epoxy

Various epoxy coatings enabling hygienic inner surface for potable water transportation and outer surface to resist soil or sea water corrosion. Coating thickness of up to 600 micron. (AWWA C 210, TS 5140, EN 12944-5)

FBE-Fusion Bonded Epoxy

Provides high protection of pipe lines used for transmission of oil, gas and water. (AWWA C 213, API 5L7, CSA Z 245-20, NACE RP 0394)

Dual-Layer Abrasion Resistant FBE

Dual layer fusion bonded epoxy provides a perfect abrasion and impact resistance, also maintains an excellent protection for gas-oil line pipes. (AWWA C 213, API 5L7, CSA Z 245-20, NACE RP 0394)

Cement Mortar ID Coating

Specifically for potable water pipe lines cement mortar ID coating provides hygienic and excellent corrosion resistance and protection. On demand regular cement mortar ID coating or synthetic dispersion added special cement mortar ID coating can be applied. (AWWA C 205, DIN 2614, BS 534, TS 10298)

Tests Performed

Coating Thickness	MFR and MVR Test	PE/PP Breaking Elongation Test
Holiday Testing	CD (Cathodic Disbondment Test)	PE Penetration Test
Impact Strength	DSC Test (Glass Transition Temperature Test)	PE/FBE/PP Impact Test
Bond Strength	Manuel Holiday Test	Cross Cut Test
Indentation Hardness	PE/PP Adhesion Test	Epoxy Bend Test
Coating Resistivity	Wet Sponge Pinhole Test	V Cut Test
Elongation Percentage at Break	Hot Water Adhesion Test	FBE Interface Contamination & Porosity Test
	Buchholz Mesaurement	Cross Section Porosity
	Shore A & Shore D Measurement	Low temperature Flexibility Test
